MSN, ARNP-C

To Whom It May Concern:

Heather L. Gawron
MSN, ARNP-C

Approximately five years ago, The Cardiology Center, Inc. expanded into its 8000 square foot building. Alberto Ramudo and the Icon Design Group were engaged to handle the design and supervise the construction. The construction was quite specialized. Not only is The Cardiology Center, Inc. a large specialty medical practice, but the construction involved the design of a CT scanning unit involving high voltage electric, complex telecommunications, and leaded walls for safety.

Rhythm Society (DG)*

We found Icon Design Group easy to work with and responsive to our requests and needs. Communication was excellent and the project came in on time and on budget.

If I can be of further assistance, please contact me.

Sincerely,

Louis D. Snyder, MD, FACC, FSCAI, MBA
